OBSERVATION CHART

Use the following chart to determine which milestones your child has mastered and which still need work. The abilities that signal mastery of each milestone are listed on the left. You can use the rating scale to rate your child in each one, as she is now. If the skill is always present, record at what age it was mastered.

Rating Scale: N = ability never present

S = ability sometimes present A = ability always present

L = child loses ability under stress (hunger, anger, fatigue, etc.)

Ability	Current Rating	Age Mastered
MILESTONE 1: SELF-		Age mustered
AND INTEREST IN THE WORLD		
1. Shows interest in different sensations for 3+	THE WORLD	
seconds		
Remains calm and focused for 2+ minutes		
Recovers from distress within 20 minutes with		
help from you		
4. Shows interest in you (i.e., not only in inanimate		
objects)		
MILESTONE 2: I	NTIMACY	
1. Responds to your overtures (with a smile, frown,		
reach, vocalization, or other intentional behavior)		
2. Responds to your overtures with obvious		
pleasure		
Responds to your overtures with curiosity and		
assertive interest (e.g. by studying your face)		
4. Anticipates an object that was shown then		
removed (e.g., smiles or babbles to show interest)		
5. Becomes displeased when you are		
unresponsive during play for 30 seconds or more		
6. Protests and grows angry when frustrated		
7. Recovers from distress within 15 minutes with		
your help		
MILESTONE 3: TWO-WAY COMMUNICATION		•
Responds to your gestures with intentional		
gestures (e.g., reaches out in a response to your		
outstretched arms, returns your vocalization or		
look)		
2. Initiates interactions with you (e.g., reaches for		
your nose or hair or for a toy, raises arms to be		
picked up)		
Demonstrates the following emotions:		
 closeness (e.g., by hugging back when 		
hugged, reaching out to be picked up)		
 pleasure and excitement (e.g., by smiling 		
joyfully while putting finger in your point or		
while taking a toy from your mouth and		
putting it in her own		
assertive curiosity (e.g., by touching and		
exploring your hair)		
 protest or anger (e.g., by pushing food off 		

fear (e.g. by turning away, looking scared, or crying when a stranger approaches too quickly) 4. Recovers from distress within 10 minutes by being involved in social interactions MILESTONE 4: COMPLEX COMMUNICATION 1. Closes 10 or more circles of communication in a row (e.g., takes you by the hand, walks you to the refrigerator, points, vocalizes, responds to your question with more noises and gestures, and continues gestural exchange until you open the door and get what he wants) 2. Imitates your behavior in an intentional way (e.g., puts on Daddy's hat, then parades around the house waiting for admiration) 3. Closes 10 or more circles using: • vocalizations or words • facial expressions • reciprocal touching or holding • movement in space (e.g. rough-housing) • large motor activity (e.g. chase games, climbing games) • communication through space (e.g., can close 10 circles with you from across the room) 4. Closes three or more circles in a row while feeling the following emotions: • closeness (e.g., uses facial expressions, gestures, and vocalizations to reach out for a hug, kiss, or cudde, or uses imitation such as talking on toy phone while you are on the real phone) • pleasure and excitement (uses looks and vocalizations to invite another person to share excitement over something; shares "jokes" with other children or adults by laughing together at some provocation) • assertive curiosity (explores independently; uses ability to communicate across space to feel close to you while exploring or playing on her own) • fear (tells you how to be protective, e.g., says "No!" and runs behind you) • anger (deliberately hits, pinches, yells, bangs, screams, or lies on the floor to demonstrate anger, occasionally uses cold or angry looks instead) • limit setting (understands and responds to your limits whether expressed through words—"No, stop that!"—or gestures—shaking finger, angry face) 5. Uses imitation to deal with and recover from	the table or screaming when desired toy not brought)
or crying when a stranger approaches too quickly) 4. Recovers from distress within 10 minutes by being involved in social interactions MILESTONE 4: COMPLEX COMMUNICATION 1. Closes 10 or more circles of communication in a row (e.g., takes you by the hand, walks you to the refrigerator, points, vocalizes, responds to your question with more noises and gestures, and continues gestural exchange until you open the door and get what he wants) 2. Imitates your behavior in an intentional way (e.g., puts on Daddy's hat, then parades around the nouse waiting for admiration) 3. Closes 10 or more circles using: • vocalizations or words • facial expressions • reciprocal touching or holding • movement in space (e.g., rough-housing) • large motor activity (e.g. chase games, climbing games) • communication through space (e.g., can close 10 circles with you from across the room) 4. Closes three or more circles in a row while feeling the following emotions: • closeness (e.g., uses facial expressions, gestures, and vocalizations to reach out for a hug, kiss, or cuddle, or uses imitation such as talking on toy phone while you are on the real phone) • pleasure and excitement (uses looks and vocalizations to invite another person to share excitement over something; shares "jokes" with other children or adults by laughing together at some provocation) • assertive curiosity (explores independently; uses ability to communicate across space to feel close to you while exploring or playing on her own) • fear (tells you how to be protective, e.g., says "Not" and runs behind you) • anger (deliberately hits, pinches, yells, bangs, screams, or lies on the floor to demonstrate anger, occasionally uses cold or angry looks instead) • limit setting (understands and responds to your limits whether expressed through words—"No, stop that!"—or gestures—shaking finger, angry face) 5. Uses imitation to deal with and recover from	
4. Recovers from distress within 10 minutes by being involved in social interactions MILESTONE 4: COMPLEX COMMUNICATION 1. Closes 10 or more circles of communication in a row (e.g., takes you by the hand, walks you to the refrigerator, points, vocalizes, responds to your question with more noises and gestures, and continues gestural exchange until you open the door and get what he wants) 2. Imitates your behavior in an intentional way (e.g., puts on Daddy's hat, then parades around the house waiting for admiration) 3. Closes 10 or more circles using: • vocalizations or words • facial expressions • reciprocal touching or holding • movement in space (e.g. rough-housing) • large motor activity (e.g. chase games, climbing games) • communication through space (e.g., can close 10 circles with you from across the room) 4. Closes three or more circles in a row while feeling the following emotions: • closeness (e.g., uses facial expressions, gestures, and vocalizations to reach out for a hug, kiss, or cuddle, or uses imitation such as talking on toy phone while you are on the real phone) • pleasure and excitement (uses looks and vocalizations to invite another person to share excitement over something; shares "jokes" with other children or adults by laughing together at some provocation) • assertive curiosity (explores independently; uses ability to communicate across space to feel close to you while exploring or playing on her own) • fear (tells you how to be protective, e.g., says "No!" and runs behind you) • anger (deliberately hits, pinches, yells, bangs, screams, or lies on the floor to demonstrate anger; occasionally uses cold or angry looks instead) • limit setting (understands and responds to your limits whether expressed through words—"No, stop that!"—or gestures—shaking finger, angry face) 5. Uses imitation to deal with and recover from	close 10 circles with you from across the
feeling the following emotions: • closeness (e.g., uses facial expressions, gestures, and vocalizations to reach out for a hug, kiss, or cuddle, or uses imitation such as talking on toy phone while you are on the real phone) • pleasure and excitement (uses looks and vocalizations to invite another person to share excitement over something; shares "jokes" with other children or adults by laughing together at some provocation) • assertive curiosity (explores independently; uses ability to communicate across space to feel close to you while exploring or playing on her own) • fear (tells you how to be protective, e.g., says "No!" and runs behind you) • anger (deliberately hits, pinches, yells, bangs, screams, or lies on the floor to demonstrate anger; occasionally uses cold or angry looks instead) • limit setting (understands and responds to your limits whether expressed through words—"No, stop thatt"—or gestures—shaking finger, angry face) 5. Communicates wishes, intentions, and feelings using words
using • words
• words
indulple gestales in a low
touch (e.g., lots of hugging or rough
housing)
4. Plays simple motor games with rules (e.g.,
taking turns throwing ball) 5. Uses pretend play or words to communicate the
following emotions while expressing two or more
ideas:
• closeness (e.g., has a doll say, "Hug me,"
then child answers, "I give you kiss")
pleasure and excitement (e.g., makes
funny words then laughs)
assertive curiosity (e.g., makes pretend
airplane zoom around room, then says it's
going to the moon)
fear (e.g., stages drama in which doll is
afraid of loud noises and then call for
mother)
anger (e.g., has soldiers shoot guns at one
another then fall down)
limit setting (e.g., has dolls follow rules at
tea party)
6. Uses pretend play to recover from and deal with
distress (e.g., plays out eating the cookie she
couldn't really have)
MILESTONE 6: EMOTIONAL THINKING
In pretend play, two or more ideas are logically
tied together, even if the ideas themselves are
unrealistic (e.g., the car is visiting the moon and
gets there by flying fast)
Builds on adult's pretend play idea (e.g., child is
cooking soup, adult asks what's in it, child answers,
"Rocks and dirt")
3. In speech, connects ideas logically; ideas are
grounded in reality (e.g., "No go sleep. Want to
watch television.")
Closes two or more verbal circles of
communication (e.g., "Want to go outside"; adult
asks, "Why?" "To play."
5. Communicates logically, connecting two or more
ideas, about intentions, wishes, needs, or feelings,
using
• words
multiple gestures in a row (e.g., pretending

to be an angry dog)	
 touch (e.g., lots of hugging as part of a 	
pretend drama in which child is the daddy)	
6. Plays spatial and motor games with rules (e.g.,	
taking turns going down a slide)	
7. Uses pretend play or words to communicate two	
or more logically connected ideas dealing with the	
following emotions:	
 closeness (e.g., doll gets hurt and Mommy 	
fixes it)	
 pleasure and excitement (e.g., says 	
bathroom words, such as "doody" and	
laughs)	
 assertive creativity (e.g., good soldiers 	
search for missing princess)	
 fear (e.g., monster scares baby doll) 	
 anger (e.g., good soldiers fight bad ones) 	
 limit setting (e.g., soldiers can hit only bad 	
guys because of the rules)	
8. Uses pretend play that has a logical sequence	
of ideas to recover from distress, often suggesting	
a way of coping with the distress (e.g., the child	
becomes the teacher, bossing the class)
