Chemical Peels

At Bridgeway our certified estheticians offer a wide range of medical grade skin peels designed to treat all skin types and concerns. Our trained staff will analyze your skin and determine which treatment is best suited for you and the desired results you're trying to achieve! Can be combined with microdermabrasion, microneedling or dermaplaning for an enhanced treatment.

Prices vary depending on strength of peel **\$100.00 - \$300.00**

Microneedling

Microneedling utilizes a system of microneedles to create microscopic chambers in the upper layers of the skin, allowing for deeper penetration of vital antioxidants and proteins. This is a painless, no downtime procedure which stimulates collagen and elastin growth, reduces the appearance of fine lines and wrinkles and improves overall texture of skin. Microneedling can also be used to treat acne scars and stretch marks, making it an effective and affordable treatment. Pair with PRP for amazing results! Face **\$200.00**—additional cost for neck, chest and body treatments may be customized.

Microdermabrasion

Microdermabrasion is designed to reduce the appearance of sun and age spots, targets damage from environmental effects. This resurfacing treatment breaks apart dead cell surface layers and smooths the skin and reduce the onset of fine lines and wrinkles. Face, neck and chest can also be treated at additional cost. Use in conjunction with chemical peels for optimal results!
\$125.00

Dermaplaning

Dermaplaning is a sterile procedure where a device is used to gently remove the fine hair on your face along with dry dead skin which can build up over time causing uneven texture and tone. This quick painless procedure allows your skincare products to penetrate deeper and gives your skin an overall smoother appearance. Can be combined with chemical peels, microdermabrasion or microneedling for a youthful glow!

Face **\$100.00**

Sclerotherapy

Sclerotherapy is a minimally invasive procedure that treats varicose veins and spider veins. It involves injecting a sclerosing agent into damaged veins. In addition to diminishing the appearance of varicose or spider veins, sclerotherapy can also reduce pain or side effects caused by damaged veins.

\$250.00 for 15 min and **\$350.00** for 30 min
