INFORMED CONSENT

The determination of an appropriate plan of medical and/or chiropractic management for medical, orthopedic or chiropractic conditions may involve or include the utilization of physical examinations, muscle testing, physiotherapeutic exercise or rehabilitation procedures done in office or at home utilizing devices appropriate for same, spinal adjustments, diagnostic imaging including but not limited to x-rays, ultrasound or MRI, electrical stimulation or TENS unit application or ultrasound applied to muscles, nerve conductive velocity testing, acupuncture, venipuncture, injections into large or small joints or muscles, or prescriptions. Should these procedures be deemed appropriate in your case, you will be examined by a doctor or his or her mid-level provider ("Provider") to determine if you have any conditions that indicate you should not engage in any of the foregoing. I am granting permission to review my medication history online.

I the Patient ("Patient") acknowledge and understand that the above procedures carry with them a small inherent risk of injury, which include but are not limited to: minor strains of the specific muscles being used during testing or rehabilitation, muscle strains, dislocations, skin irritation, costovertebral sprains, fractures, disc trauma, minor burns, dizziness, bruising, local swelling, stroke or fatality, stomach upset, allergic reactions, electrical shock, injection site pain irritation or infection, bleeding or erythema, high levels of anesthetic in central nervous system in the event of inadvertent injections into blood vessels, temporary anesthesia or numbness or weakness in area injected, vasovagal reaction (fainting), soft tissue swelling, hematoma formation, nerve trauma or compartment syndrome requiring possible surgical decompression, joint stiffness, vessel nerve or joint injury, pneumothorax requiring possible intubation, gastrointestinal upset, nausea, headaches, hoarseness, difficulty swallowing or strange tastes, dimpling of skin, and rare side effects of medications utilized may include retention of salt and water, transient disturbances of blood sugar, blood, hemorrhage or pus in affected area, and allergic reactions which in rare cases can be severe, disability or fatality, seizure, arrhythmia, anaphylaxis, paralysis, or cardiac arrest. If you are receiving an injection involving Hyaluronate, you need to inform your provider if you have an allergy to chicken, eggs, feathers, or vaccine products derived therefrom. The Patient is at all times free to engage in alternatives to procedures which include not receiving or refusing the procedure, or other appropriate medical or surgical management. Patient always has the right to refuse any procedure at any time. It is Patient's responsibility to inform Provider if Patient does not want the procedure or wishes to stop the procedure after it has started. It is Patient's responsibility to inform Provider of any prior adverse outcome or reaction to a similar treatment previously, or if such a reaction occurs during or after a procedure in this office.
