

Skinbetter Science Information

AlphaRet/Intensive AlphaRet

- A unique combination of an AHA and a retinoid that provides visible skin rejuvenation with little-to-no irritation.
- Intensive includes more Glycolic acid to enhance re-texturization
- Optimal effectiveness with minimal irritation. When applied to the skin, this double conjugated retinoid undergoes double hydrolysis to release both the collagen invigorating retinoid and the skin re-texturizing lactic acid. While these two ingredients are known to be potentially irritating on their own, the natural and gradual breaking of these double bonds via hydrolysis delivers exceptional efficacy, with little-to-no irritation.
