

Science of CALECIM® Professional

- All CALECIM® Professional products are enhanced with a patented protein mix secreted by cord lining stem cells. This active ingredient comprises of powerful youth-activating proteins and growth factors.
- The protein mix derived from these two types of stem cells are able to effectively communicate with every layer of the skin to rejuvenate and rebuild.
- CALECIM® Professional's source of cord lining is from red deer from New Zealand. They are ethically sourced with no harm to the deer.

Unique 'Youth Messaging' System

- CALECIM® Professional's active ingredient is a collection of these messages; and can be considered 'Youth Messages' that trigger skin cells to behave in a more youthful manner.
 - These messages direct skin to:
 - Increase skin fullness: Skin improves in volume, firmness and plumpness.
 - To heal better: To combat daily ravages from the environment.
 - To activate epidermal cell turnover: Skin surface is continually renewed, ensuring a youthful radiant complexion.

Multi-Action Cream

- When to use: Pre-moisturizer as a corrective treatment. Can be used with current skin regimen including AHAs, retinoids and anti-oxidants.
- What it does: Triggers structural cells to rebuild.
- Effects: Skin is firmer and tightened. Elasticity and skin density are improved.

Restorative Hydration Cream

- When to use: As a moisturizer on its own, or together with current skin treatments including AHAs, retinoids and anti-oxidants.
- What it does: Hydrates deeply with stem cell derived hyaluronic acid. Triggers skin to produce its own moisture.
- Most visible effect: Improved radiance with plumping effect.

Professional Serum

- When to use: After in-clinic aesthetic treatments, such as dermabrasion, IPL, micro-needling, chemical peel, laser etc. Can be used at home as a deeply regenerative skin treatment, after exfoliation or home microneedling.
- What it does: Optimizes in-clinic results. Accelerates skin regeneration and repair.
- Most visible effect: Reduces procedure downtime by diminishing redness and swelling. When used at home after microneedling, skin feels tight and radiant, and is visibly firmer.
