- Parkinson's Disease
- Alzheimer's Disease

NAD+

(nicotinamide adenine dinucleotide)

is a vital resource found in all living cells. We use it every day. We now know NAD isn't a constant resource. Things like overeating, staying in the sun too long, drinking alcohol or taking drugs can stress our systems and cause NAD levels to decline. Some scientists even think this NAD decline plays a major role in how we age.

Integrating specific treatments to tailor a program to get you to optimal health.

NAD+

NAD (Nicotinamide Adenine Dinucleotide) is a coenzyme that inhabits every cell of your body. As it is produced by and inhabits every cell in the body, NAD is essential for our cells to produce the energy necessary to impact physical and mental health as well as cellular aging.

Infrared Therapy

Infrared light is the invisible part of the sun's spectrum with the ability to penetrate human tissue to produce a host of health benefits. Since Infrared Therapy heats the body directly rather than simply warming the air, it raises the core body temperature and produces a deep, detoxifying sweat at the cellular level, where most toxins reside.

Nutritional IV Infusions

By introducing nutrients directly into the bloodstream, they bypass the GI tract and go into the circulatory system quickly supplying it at the cellular level. IV Therapy is used to attain therapeutic blood levels of certain vital nutrients.

Outpatient Referral and Setup Service

Upon completion of therapy, BWG will work with you to set up a maintenance and support system to make sure you are successful with your treatment program.

WELLNESS

Researchers investigating brain health and longevity have found NAD is an essential coenzyme that promotes cellular regeneration. Studies have found replenishing cellular levels of NAD+ can repair DNA, protect brain cells from damage, reduce inflammation and turn on enzymes that help prevent aging.

BRIDGEWAY WELLNESS

ADDICTION

Intravenous NAD has been used since the 1960s to help individuals detoxify from alcohol and opioid dependencies. In the last ten years, NAD has been more widely used to help detoxify from other types of chemical dependencies, including benzodiazepines, methadone, suboxone, methamphetamines and stimulants.

CHRONIC

Many chronic conditions, including chronic fatigue syndrome, neurodegenerative disease and mental health disorders have been linked to cellular dysfunction and dysregulation. NAD therapy may help reduce the symptoms of many chronic conditions, and may help individuals suffering from chronic conditions regain their vitality and strength.

Our Clients Tell The Story

As an Opiate Addict, I was extremely fearful of withdrawal symptoms. Had I known that it would have been this easy, I would have used NADpure to detox a long time ago.

-Anonymous

After my 10 day IV treatment, I received an “eraser effect”. I have to remind myself that I used to be alcohol dependent. I feel amazing!!

-New Orleans, LA

I was diagnosed with Parkinson’s over 10 years ago. My shaking was so bad I could not eat with a spoon. Within one treatment my tremors went away.

-A. Thompson

Having battled Depression all my life, I had tried every psychotropic medication on the market. Because of this treatment approach, that integrates medication, nutraceuticals, laser and unconditional love, I am gratefully living my life free from the oppression of depression.

-Mandeville, LA

BRIDGEWAY

WELLNESS GROUP, LLC

We are only a phone call away. Allow us to create a program to bring you back to “YOU”.

While the approach to wellness is highly scientific, the environment created at Bridgeway Wellness, is welcoming, non-judgmental and relaxed, so patients can focus on reducing stress and improving their health and overall well-being.

Our staff of highly trained doctors and nurses understand that your commitment to wellness is their number one goal and your treatment and program will be administered with compassion and caring.
