TODAY'S PROCEDURE: Diagnostic Medial Branch Nerve Blocks

1. If you received IV sedation with the procedure, your reasoning, coordination, and reflexes are decreased.

Therefore:

A. You must not operate a vehicle or use machinery/appliances for twenty-four (24) hours.

B. Avoid making critical decisions for twenty-four (24) hours.

C. No alcoholic beverages for twenty-four (24) hours.

2. Return to your usual diet.

3. Resume all preoperative medications. EXCEPT DO NOT RESTART NSAIDS for 24 hours

4. Keep dressing dry and intact for 24 hours.

5. Do not shower for 24 hours, do not bathe or swim for 48 hours.

6. Contact your physician if you notice bleeding or drainage from the puncture site, unusual redness or swelling around the site, new persistent pain, fever above 100 degrees F.

SPECIAL INSTRUCTIONS:

1. Your procedure is diagnostic; it is of vital importance that you purposefully perform provocative maneuvers in order to evaluate treatment efficacy over the next 4 to 6 hours. Keep a pain diary and record the overall percentage of improvement and duration of relief. Although long term relief may not occur, this aids your referring physician in isolating the source of your pain.

2. Please do activities that will bring on the normal pain that we are rating. For example, if vacuuming or walking increases the pain, do that. This will give the most accurate response to the diary

Patient Instructions: Post Procedure Fall Precautions

After Your Procedure

- Have someone check on you for the next 12 hours.
- Always have a way to call for help. If you have a cell phone or portable phone, keep it with you at all times for the next 12 hours.
- Keep a phone next to your bedside or area where you rest post-procedure.
- Keep a list of emergency numbers near the phone.

To Get Up from Bed

- Clear bed sheets from your feet.
- Move to the edge of the bed and roll onto your side. Push yourself up with your hand.
- At the same time, swing your legs over the side of the bed.
- Sit on the edge of the bed for at least 30 seconds before standing up.
- With both feet firmly on the floor, put your hands beside you on the bed and slowly push yourself up.

Get Help to Move Around

- Take your time getting up at home and if needed, ask someone to help you.
- Sit up slowly and with help.

Keep Things Within Reach

- Keep the things you use often within easy reach, like tissues, remote control, snacks and drinks.

What to Do If You Fall

- Above all try to stay calm
- If you start to fall, try to relax your body. This will reduce the impact of the fall.
- Call family member for assistance.
- Don't rush to get up. First, make sure you're not hurt.
- Be sure to get checked by your healthcare provider for any injuries.

Using Curbs and Stairs

- Curbs, steps, or uneven pavement can trip you. Take care when near them.
- Check the height of a curb before stepping up or down. Be careful with uneven and cut-out sections of curbs.
- Don't rush when crossing the street. Watch for changes in pavement height.
- On stairs, grasp the handrail and take one step at a time. If you ever feel dizzy on stairs, sit down until you feel better.
