TODAY'S PROCEDURE: Stem Cells Injection

- You have received a Stem cells Injection. This is a natural injection to help you heal.
- Keep the injection site clean.
- ***It may take few weeks to start noticing effects, it depends on your body's and injection site healing processes. Your diet, sleep, and exposure to toxins is going to enhance or worsen your healing processes so do your best to maintain good nutrition, adequate sleep, vitamins and supplementation. And refrain from smoking, vaping, drugs, and limit alcohol consumptions while healing from stem cells treatment.***
- If you received your own harvested stem cells vs donated placental stem cells, then donor site (fat or pelvic bone) maybe sore for few days after the procedure, maintain the cleanliness and care of the stems cells donor site as you do for the injection site.
- You may experience pain or soreness at the site of the injection (and site of stem cells harvesting). You may apply a cold or heating pack 10 minutes at a time, 4-5 times a day for 4 days.
- A very small percentage of patients may experience an increase in their usual pain for two or three days following the procedure. If this increase in pain persists past three days, please contact our office.
- If you experience any swelling, redness, bleeding or discharge from the site of the injection or If you have a fever greater than 100 degrees Fahrenheit. Please contact our office or present to the nearest emergency room.
- You can resume regular activities within 24 hours, but refrain from heavy sports for 2-3 weeks from injection date.
