# Robotic arm. Human touch.

Robotic surgery is a precise and minimally invasive way to perform a variety of surgeries, including heart, prostate, gynecological and chest surgeries. That means less pain and faster recovery.

But robotic surgery isn't push-button surgery. It takes a special team of surgeons to use the robot to its full potential — and we have that team:

**Julio Arronte, M.D.** ■ gynecologic surgery

**Darren Bruck, M.D.** ■ prostate/urologic surgery

**Scott Dunkin, D.O.** ■ gynecologic surgery

**Mark Dylewski, M.D.** ■ thoracic/chest surgery

**Ricardo Estape, M.D.** ■ gynecologic oncology surgery

**Anthony Gonzalez, M.D.** ■ bariatric surgery

**Armando Hernandez-Rey, M.D.** ■ gynecologic surgery

**Eduardo Krajewski, M.D.** ■ colorectal surgery
