

### **hCG Medical Weight loss:**

Are you frustrated by diets that are complicated, don't work, or leave you hungry and tired? Oftentimes, people experience 'yo-yo dieting', which occurs when people's weight fluctuates back and forth, never getting the results they are seeking.

Our hCG Dietary Counseling & Weight Loss Program could be the solution for you! On this proven diet and lifestyle program, patients lose an average of 1/2 to 1 pound per day without hunger or side-effects. For many people, the program is a great alternative to stomach banding or bypass surgery and is an easy way to drop—and keep off—stubborn weight. The program is either 21 days or 40 days depending on your weight loss goals.

We offer free 15-minute consultations to see if this program is right for you!
