

## Clear + Brilliant® Uncover the Brilliance Today

*Clear + Brilliant® System: Designed for patients seeking a simple, smart skincare solution to fight the effects of aging skin, while unveiling beautiful, radiant skin without turning to severe or expensive treatments.*

Clear + Brilliant is an affordable treatment that utilizes fractional laser technology to address and help prevent early signs of aging for both men and women of all skin types. The Clear + Brilliant technology is a perfect way to address skin concerns without resorting to more aggressive laser resurfacing treatments. Since the Clear + Brilliant laser is a gentle yet effective skincare treatment, consumers can expect improved skin tone, smoother texture and softer, glowing skin.

### Features and Benefits

- An **effective** and **non-invasive** solution to address and help prevent signs of aging
- A **quick, minimal downtime treatment** that can be completed within a “lunch hour”
- A smart way to **protect your skincare** investment
- **Complements other treatments**, such as injectables and fillers
- **Visible results**, including glowing and softer skin

### How it works

Clear + Brilliant is a gentle laser that refreshes your skin from the inside out. The laser energy creates millions of microscopic treatment zones in the upper layers of the skin, replacing damaged skin with healthy, younger looking tissue. After treatment session(s) that takes about 20 minutes or less, Clear + Brilliant revitalizes skin and brings back a natural, radiant glow without the downtime of more invasive treatments.

Most consumers experience immediate and progressive results that can last for months depending on age, skin condition and how the patient protects the skin. The cost of Clear + Brilliant treatments is based upon the number of treatment sessions, and varies by market/country and place of treatment.

*The Clear + Brilliant System is commercially available in the United States for coagulation of soft tissue and general skin resurfacing procedures.*

## Important Safety Information

06MAR2015

Clear + Brilliant Laser System  
1440nm and 1927nm (Perm ea) Handpieces

### INDICATION

Clear + Brilliant Laser System (1440nm and 1927nm handpieces) is indicated for dermatological procedures requiring the coagulation of soft tissue and general skin resurfacing.

### IMPORTANT SAFETY INFORMATION

- The following contraindications are routine for many laser treatments and may also be associated with non-ablative Clear + Brilliant Laser System treatments. You may not be an appropriate candidate for a treatment if you:
  - o Have been diagnosed with or possibly have actinic keratosis, melasma, rosacea, or other significant skin conditions (e.g., skin cancer, active infections, cold sores, open wounds, rashes, burns, inflammation, eczema, psoriasis);
  - o Are predisposed to keloid formation or excessive scarring;
  - o Have a condition that may compromise the immune system, such as HIV, lupus, scleroderma, or systemic infections;
  - o Have a known sensitivity to light or if you are taking photosensitizing agents or medications;
  - o Are on systemic steroids (e.g., prednisone, dexamethasone), which should be rigorously avoided prior to and throughout the course of treatment;
  - o Are using retinoids, which should be avoided for at least 2 weeks prior to and during treatment;
  - o Are undergoing isotretinoin acne treatment or taking drugs in a similar class;
  - o Have skin that is still recovering from a cosmetic procedure, such as a chemical or mechanical peel, or laser resurfacing; and
  - o Have had botulinum toxin injections, or dermal fillers (such as collagen or hyaluronic acid) within the past 2 weeks.
