Living lines are part of aging.

Everyday life means a lot of stress to the sensitive skin around the mouth. That includes eating and drinking, talking, laughing, and all of the ways we express ourselves. So when it comes to aging, it’s no wonder the living lines around the mouth continue to develop and deepen.

It’s the end of the line for lips.

Restylane® Silk smooths those living lines around your mouth and delivers fuller lips with natural-looking results. It’s a unique formulation of hyaluronic acid, which occurs naturally in youthful skin. And because it’s designed for precision, it allows your specialist to create the subtle enhancement you’re looking for.

The reviews of Silk are in.*

See what over 2300 people said about their Silk treatment.

- 91% saw natural-looking results
- 88% were satisfied or very satisfied with their Silk treatment
- 85% would recommend Silk to a friend or family member

In a self-reported survey on RealSelf.com, 96% gave Silk a WORTH IT rating.

The most commonly observed side effects are swelling, tenderness, bruising, pain, and redness at the injection site. These are typically mild in severity and resolve in 2-7 days after treatment.

Never stops laughing.
Anne’s Silk story.

Years of laughing left Anne with lines around her mouth. And while she never wants to stop laughing, she was ready for a smooth lip line.

“My lip lines have actually changed. They’re smoother, they’re fuller. I feel sexier and more confident.”

Before | After (Day 7)
---|---
1.5 mL of Restylane® Silk in lips.
0.8 mL of Restylane Silk in perioral (lip) lines around the mouth.

Actual Restylane® Silk patient. Individual results may vary.

Always sipping.
Carol’s Silk story.

Carol says she likes to drink with straws. But all that sipping has left her with lines around her mouth.

“My lips are fuller and softer, and it’s so much nicer putting lipstick on.”

Before | After (Day 7)
---|---
0.5 mL of Restylane Silk in lips.
0.5 mL of Restylane Silk in perioral (lip) lines around the mouth.

Actual Restylane® Silk patient. Individual results may vary.

After treatment, you might notice some swelling, redness, pain, bruising, or tenderness. This is typically mild in severity and normally lasts less than 18 days in lips.
Want more volume in your lips?

If you want even more definition in your lips, Restylane-L® could be right for you. Talk to your specialist about how to get your most beautiful results.

See Restylane-L results.

Victoria, 50

Before

After (Day 7)

3 mL of Restylane-L in nasolabial folds, marionette lines, and upper lip.

Products in the Restylane family contain traces of gram-positive bacterial protein and are contraindicated for patients with allergies to such material or in patients with severe allergies that have required in-hospital treatment. These products should not be used by patients with bleeding disorders or by pregnant or breastfeeding women. Restylane-L, Restylane® Silk and Restylane® Lyft with Lidocaine should not be used by anyone with a known allergy to lidocaine. Products should not be injected anywhere except areas indicated in their Instructions for Use.
Important Safety Information

Indications: The Restylane family of products includes Restylane®, Restylane-L®, Restylane® Lyft with Lidocaine and Restylane® Silk. Restylane, Restylane-L, and Restylane Lyft with Lidocaine are indicated for the correction of moderate to severe facial wrinkles and folds, such as nasolabial folds.

Restylane and Restylane-L are indicated for mid-to-deep dermal implantation. Restylane and Restylane-L are also indicated for submucosal implantation for lip augmentation in patients over the age of 21.

Restylane Lyft with Lidocaine is indicated for implantation into the deep dermis to superficial subcutis. Restylane Lyft with Lidocaine is also indicated for cheek augmentation and for the correction of age-related midface contour deficiencies in patients over the age of 21.

Restylane Silk is indicated for submucosal implantation for lip augmentation and dermal implantation for correction of perioral rhytids in patients over the age of 21.

Products in the Restylane family contain traces of gram-positive bacterial protein and are contraindicated for patients with allergies to such material or in patients with severe allergies that have required in-hospital treatment. These products should not be used by patients with bleeding disorders or by pregnant or breastfeeding women. Restylane-L, Restylane Silk and Restylane Lyft with Lidocaine should not be used by anyone with a known allergy to lidocaine. Products should not be injected anywhere except areas indicated in their Instructions for Use.

Use of products in the Restylane family at the site of skin sores, pimples, rashes, hives, cysts, or infection should be postponed until healing is complete. The most commonly observed side effects are swelling, redness, pain, bruising, headache, tenderness, and itching at the injection site. These are typically mild in severity and typically resolve in less than 7 days in nasolabial folds and less than 14 days in lips. Serious but rare side effects include delayed onset infections, recurrence of herpetic eruptions, and superficial necrosis at the injection site. Do not implant into blood vessels. Use with caution in patients recently treated with anticoagulant or platelet inhibitors to avoid bleeding and bruising.

The Restylane family of products is available only through a licensed practitioner. Complete Instructions for Use are available at www.RestylaneUSA.com.
