

Dr. Thomas Rambacher, FACFAS, FAWCA

Double Board Certified Doctor of Podiatric Medicine

WHEN it comes to podiatry care, Dr. Thomas Rambacher is leading the way with the most advanced treatment options. Dr. Rambacher offers innovative alternatives to traditional surgery, including minimally invasive surgical procedures and state-of-the-art regenerative medicine to safely and effectively accelerate the natural healing process. Ever on the cutting edge, Dr. Rambacher incorporates everything from cord blood to next generation platelet rich plasma to augment or assist with traditional podiatric procedures.

Regenerative medicine has been proven to successfully treat acute and chronic wounds because of its ability to restore the body's natural healing barriers. Regenerative therapies also decrease the inflammation and pain commonly associated with podiatric procedures.

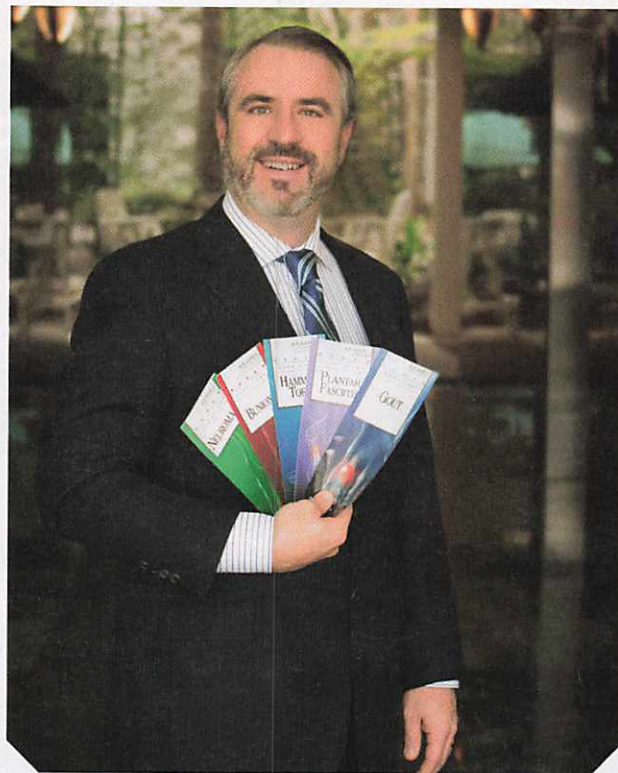

"These treatment options are ideal for anyone who wants less down time and a faster recovery process," says Dr. Rambacher. "In my practice, I'm seeing exceptional results using regenerative therapies to treat everything from bunions and sports injuries to diabetic foot ulcers."

Dr. Rambacher also offers ultrasound treatments, interferential treatments, radio frequency treatments, pneumatic medical treatments, and herbal medicines. Known for his compassionate, solution-minded approach, Dr. Rambacher emphasizes podiatric care that offers patients an accurate diagnosis and personally-tailored treatment plans. "By getting the diagnosis right the first time we help patients avoid painful and costly corrective procedures later."

If you or someone you know is in need of any type of foot or ankle podiatry care, you can trust Dr. Thomas Rambacher, a double board certified podiatric surgeon known for his skill, experience and expertise.
