

About Dr. Rambacher

Thomas Rambacher is a Doctor of Podiatric Medicine with expertise in surgical and non-surgical techniques to solve foot and ankle problems. Dr. Rambacher is double board certified in Podiatric Surgery with The American Board of Podiatric Surgery and in Primary Podiatric Medicine with the American Board of Multi Specialties in Podiatry, emphasis on wound care.

His treatment focuses on limiting downtime from hobbies, work and general activities.

Most surgeries are done in conjunction with the philosophy of walk-in/ walk-out surgery, and continue walking without the need for crutches or casts.

Put your feet on the road to recovery!

Diagnostic Podiatry

Dr. Rambacher's foot and ankle practice focuses on the diagnosis of the underlying conditions that cause foot and ankle problems. This practice of diagnostic podiatry incorporates special attention to a patient's medical history, including medical conditions that may contribute to the occurrence of foot and ankle problems such as bunions, plantar fasciitis, arthritis, toenail problems, chronic ankle sprains, and infections.

Our Office Experience

Our friendly staff is compassionate, caring and attentive to our patients' needs as well as the needs of their families. Our front office staff is very helpful and able to assist with any paperwork and insurance inquiries. The practice has patient online scheduling. Complimentary coffee and other beverages are offered to all of our patients. Our back office offers a high level of diagnostic technology as well as a thoughtful consideration to detail.

With our extended hours, we are able to see patients at their preferred time. We understand each person's time is valuable. If you or a loved one doesn't have the ability to come to our office, the doctor will come to your home anywhere in Orange County. Our home service treats diseased nail care and includes access to vascular testing (PEDES), home nursing care, mobile x-ray, and Diabetic custom shoe wear.

"I encourage patients to be involved in their treatment plans," says Dr. Rambacher. "I take the time to explain treatment options in detail and always provide patients with my direct line so they can reach me should any questions arise."
