

# GENTILE

## Press Release

### ***UltraLift™* is the Ultimate Technology Assisted Facelift and is the Result of Years of Research and Optimization**

When Surgery and Technology are blended together a result is achievable that is better than either of the approaches individually. This is known as Synergy and Dr. Gentile was one of the first to advocate Technology assisted Face-lifting in 2008. This advance was made possible by the recognition that energy based devices used under the skin exert a skin tightening effect that adds to the rejuvenation achieved by skin lifting in a Facelift procedure. First performed with fiber lasers under the skin the evolution moved to temperature controlled Radiofrequency energy both monopolar and bipolar. Finally Helium Plasma and third generation hi frequency ultrasound round out the assortment of energy devices which can be used to facilitate and improve Face-lifting results.

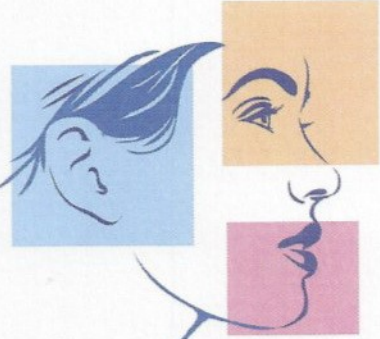

Dr Gentile is please to announce that the energy assisted facelift has evolved to provider more long lasting effects in the lower face and neck. The lift now know as the "ULTRALIFT" Advantages include

- ♦ Greater effect on areas of the face needing contouring including jowls and double chins
- ♦ For the surgeon reduced bleeding due to the energy devices results in easier to perform surgery
- ♦ Skin Tightening and remodeling can result in significant reduction in skin elasticity
- ♦ Stronger tightening is possible in jawline and upper neck due to Ultrasound effects

***UltraLift*** is the most technologically advanced Facelift ever offered and gives natural and long-lasting results that can last for more than 10 years.

For more information on Dr. Gentile and his practice in Technology based Aesthetic & Laser Surgery including facial eyelid and neck rejuvenation surgery, advanced energy body contouring, skin rejuvenation, fillers and neuromodulators or to schedule a consultation with Dr. Gentile please call the office at 330-758-2001 or visit [www.faciaplastics.org](http://www.faciaplastics.org).
